

# TWIST

Sofa System

## DESIGN

Ozan Sinan Tıǵlıoǵlu

## MATERIALS

Skeleton structure consists of wood.

3 mm MDF is used in the entire body.

The 3-lined elastic column is used for sitting and back.

Foams:

\*70 mm 32 DNS (B1 quality) foam is used for the seat.

\*20 mm 28 DNS (B1 quality) foam is used for the front of the seat.

\*28 mm 28 DNS (B1 quality) foam is used for the back and inside of the arms surface.

Foams are gummed to the sofa with special glue. 100 gr of fiber is gummed on the foams.

Foams are fire retardant.

Accorrding to fabric form cutting and sewing process continues.

The fabric is fixed to the product with special fabric staples.

Fabrics are fire retardant.

Under the couch, the wire (90 gr) is punched with staples.

There are two leg option. First option is wood and there are different lacquer colors for the legs. Second option is produced from 25x2 cm of pipe and coated by chrome. Legs are assembled by bolts with sofa body.
