Table System

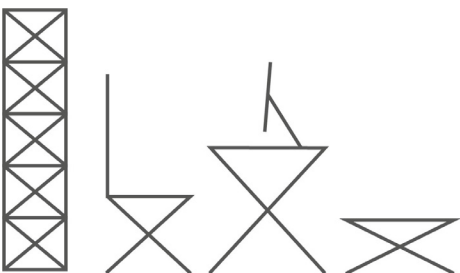

DESIGN

Ozan Sinan Tiğlioğlu

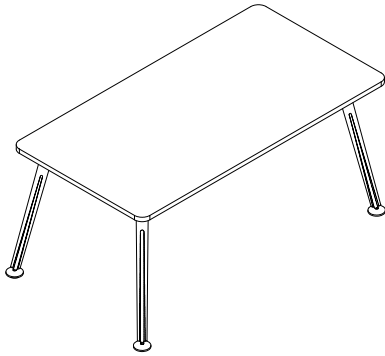

The basic design constituting the leg structure brings us a soft touch into a standard material in the unique light of change that nature offers us. We can describe this product as 'Instead of sharp corners, a flexible angle, a good combination and a different form of leg'.

Different colors make it possible for us to touch emotions and entertainment. In addition, it allows us to exhibit a parallel approach to the spatial structure and obtain fundamentally new perspectives in planning an office.
